About

I'm an aspiring backend software developer with a bachelor's degree in Architecture.

Working knowledge

CONCEPTS	TECHNOLOGIES
○ Time- and space complexity, Big O	○ Python 3
○ Object Oriented Programming	○ Java 8
○ Clean Coding	○ Git
○ SOLID principles	○ Junit 5
○ Test driven development	○ Maven (pip)
○ Relational Databases	○ MySql (SQLite, JPA)
○ Networks and APIs	○ Spring (Spring Boot)

Education

SEPT 2014 - MAJ 2015
BME Faculty of Architecture, Budapest

My studies in architecture started at BME, but I could't hone my skills in design as I'd hoped.

SEPT 2015 - MAJ 2020   - Bachelor of Arts
MOME Faculty of Architecture, Budapest

Studied interior- and architectural design in MOME, while also gaining some insight into wood- and metal working, through projects in the workshops.

JAN 2019 - DEC 2019   -architectural intern
NaturArch

FEB 2019 - MAJ 2019   -first 10 lessons in Python
Holy Bytes

The beginner course at Holy Bytes was the first programming I've done since high school.

JUN 2020 - SEPT 2020   - first course in programming certificate
Udacity Data Structures and Algorithms

During Udacity's course I became more confident that programming is something I could do as well as enjoy. I've been studying on my own since then following a home
